Right of Way Final Plans

Right of way acquisition in accordance with the preliminary right of way plans on file in the Right of Way Unit has been determined to be necessary for public use and was authorized by the Board. Certain changes in the right of way have necessitated alteration of the preliminary right of way plans. Final plans have been prepared and provided for the construction, design, drainage, and control of access for these projects. The Board finds that such rights of way and control of access as shown on the final plans are for public use and are necessary for construction. The sections of road projects which were shown on the preliminary plans as sections of road projects to be abandoned are hereby abandoned and removed from the State Highway System for Maintenance upon the completion and acceptance of the project.

The rights of way for the location, design and construction of highways embraced in the following projects shall be as shown in detail on the final plans for said projects as follows:

July 2026

Bertie County Comprehensive Transportation (CTP) Plan - Highway Recommendations

1. Future I-87/US 17 Improvements

Four separate recommendations call for upgrading sections of US 17 through Bertie County to interstate or freeway standards. Together, the projects would create a more continuous Future I-87 corridor connecting the Martin County line, Windsor, and the Edenton-Windsor Loop. The improvements would strengthen regional connections between northeastern North Carolina, Raleigh, and Norfolk.

2. NC 11 and NC 308 Intersection Improvement

The plan recommends improvements at the NC 11/NC 308 intersection to enhance traffic operations and safety.

3. US 13 Freeway Upgrade

A section of US 13 is recommended for conversion to freeway standards, including improved access control and roadway operations.

4. NC 11 Widening

The plan recommends widening a portion of NC 11 to a four-lane divided facility to provide additional capacity and improve north-south travel through the county.

5. NC 45 Widening – R-5809

The NC 45 project would widen existing travel lanes and shoulders along the corridor. The improvement is divided into multiple project segments and is intended to improve mobility and safety between the Washington County area, Midway, Colerain, and the Hertford County line.

These recommendations represent long-range transportation needs identified in the CTP. Additional project development, environmental review, prioritization, and funding decisions will be required before individual projects proceed to construction.

“Connecting people, products and places safely and efficiently with customer focus, accountability and environmental sensitivity to enhance the economy and vitality of North Carolina...”

- NCDOT Mission Statement

Public Input Open for the 2028- 2037 STIP

NCDOT is accepting public comments through July 31 on transportation projects being considered for the 2028 - 2037 State Transportation Improvement Program. Residents may review projects, indicate priorities, and provide comments through NCDOT's interactive prioritization map.

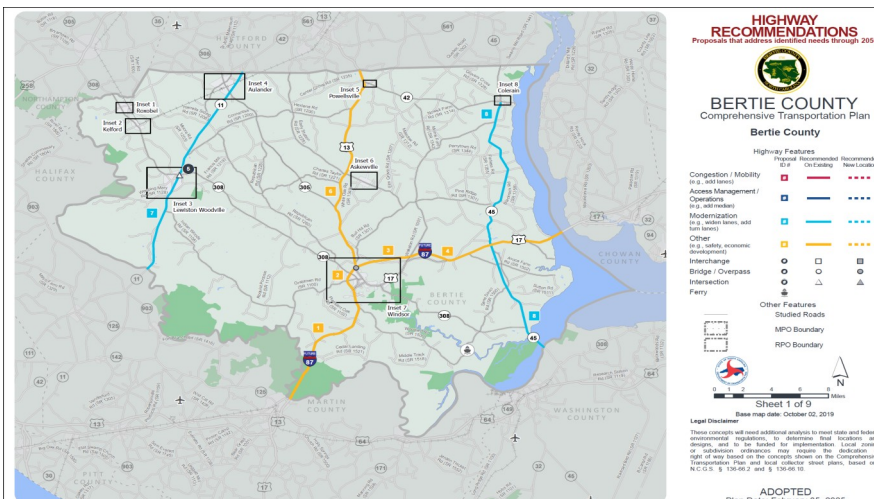

Public input is particularly important because local input points account for 30% of Regional Impact project scores and 50% of Division Needs project scores. NCDOT expects to release the Regional Impact funded-project list in late summer or early fall, followed by the draft STIP and another public-comment period in early 2027.

NCDOT will also hold two relevant drop-in meetings on Tuesday, July 14, from 4:00 to 6:00 p.m.:

Bertie, Hertford, and Northampton counties: Division 1 Office, 113 Airport Drive, Edenton

Halifax County: Division 4 Office, 509 Ward Boulevard, Wilson

Although these meetings occur before the July 16 PBRPO meeting, online comments will remain open through July 31.

July Bertie County US 13 Safety Project

NCDOT has established \$80,000 in preliminary-engineering funding for project HS-2601G. The project will install advanced-warning flashers and signs at selected intersections along US 13 in Bertie County, as well as locations along the US 17 Bypass in neighboring Division 1 counties.

Northampton County NC 305 Upgrade

NCDOT approved an additional \$150,000 in preliminary-engineering funding for project R-5757, which would upgrade NC 305 from the Seaboard town limits to the Hertford County line. Approximately \$5.56 million had previously been approved for preliminary engineering. The additional funding is scheduled for FY 2027.

Halifax County I-95 Rehabilitation

NCDOT The July Board agenda included an additional \$800,000 for project I-5932A, which will rehabilitate I-95 pavement from NC 561 at Mile Marker 160 to Mile Marker 167 in Halifax County. Approximately \$12.79 million had previously been approved for construction.

Subject: NCDOT Pedestrian Safety Call for Projects Opens July 13
Date: Monday, July 6, 2026 7:40:05 PM
Attachments: [image001.png](#)

The NCDOT is excited to announce an open Call for Projects focused on pedestrian safety. The Call for Projects will open on **July 13th** and runs through **August 28th, 2026**.

This call for projects is specifically focused on improvements in smaller urban and rural areas that can be obligated relatively quickly and require little to no right-of-way acquisition. Eligible pedestrian safety projects include a range of pedestrian-focused improvements, such as:

- Marked crosswalks, curb ramps, visibility enhancements or traffic control at crossings
- Marked crosswalks, curb ramps and pedestrian WALK phasing at signalized intersections
- Improved crossings at unsignalized or midblock locations

Important aspects of this effort:

- Cost estimates are not needed at the time of project submission. NCDOT will develop estimates for selected projects.
- Local matching funds are not needed for selected projects.
- NCDOT will administer and deliver selected projects.
- Selected projects will target construction fund obligation dates of June 2027 or June 2028:
 - Projects that are ready for obligation by June 2027 will target that funding cycle.
 - Selected projects requiring additional preliminary work or coordination will target June 2028.
- **Projects submitted during the 2025 open call for pedestrian safety projects that were not selected to move forward should be resubmitted during this open call to ensure consideration.**

The following website contains more details about the Call for Projects, including a map of eligible areas, entities that are eligible to submit projects, scoring criteria, and a link to submit projects: <https://connect.ncdot.gov/resources/safety/Pages/Pedestrian-Safety-Project-Call.aspx>

In addition, **NCDOT will host a webinar on July 28th at 10:00am** to provide additional information and be available for questions. The webinar will be recorded for those that are not able to attend. You can register for the event [here](#).
